Item 8.01 Other Events

The Company disclosed certain operating metrics and supplemental risk factors regarding the Company in the preliminary prospectus supplement relating to the Offering filed with the Securities and Exchange Commission (the “SEC”) on June 6, 2019. Accordingly, the Company is filing the following information in this Current Report for the purpose of supplementing and updating certain business and risk factor disclosures contained in the Company’s prior public filings.

Certain Operating Metrics

The following operating metrics are based on unaudited financial results and customer-related data for charlesandcolvard.com, LLC, a wholly-owned subsidiary of the Company, for the nine-month period ended March 31, 2019:

- Average order value (“AOV”) is estimated to be \$1,000, based on charlesandcolvard.com revenue, net of returns, divided by the total number of customer orders.
- Average ad spend per new customer is estimated to be \$220, based on the total advertising spend focused on charlesandcolvard.com traffic divided by the number of first-time customer orders.
- Repeat customers represent 28% of charlesandcolvard.com’s total customer orders, based on customer email addresses.

The following operating metrics are based on unaudited financial results and customer-related data for charlesandcolvard.com, LLC for the three-month period ended March 31, 2019 compared to the three-month period ended March 31, 2018:

- 55% year-over-year growth in charlesandcolvard.com revenue.
- 12.5% year-over-year growth in social media followers; 41% year-over-year growth in opt-in email subscribers.

For the nine-month period ended March 31, 2019, gross margin (defined as net sales less product line cost of goods sold) for the Company’s Online Channels segment was 57% of Online Channels net sales.

Risks Related to Our Company

We depend on a single supplier for substantially all of our silicon carbide (“SiC”) crystals, the raw materials we use to produce moissanite jewels; if our supply of high-quality SiC crystals is interrupted, our business may be materially harmed.

We are party to an exclusive supply agreement with Cree, Inc. (“Cree”), which we depend on for the provision of substantially all of the SiC material we use to produce moissanite jewels. Under the terms and conditions of the exclusive supply agreement with Cree (the “Supply Agreement”), we agreed to purchase from Cree, and Cree agreed to supply, all of our required SiC material, subject to terms and conditions that allow us to purchase certain amounts of SiC materials from third parties under limited conditions. The Supply Agreement is set to expire in 2023 and we have the option, subject to certain conditions, to unilaterally extend the term of the Supply Agreement for an additional two-year period following expiration of the initial term. If our supply of high-quality SiC crystals is interrupted, then we may not be able to meet demand for moissanite jewels and our business may be materially and adversely affected. Cree has certain proprietary rights relating to its process for growing large single crystals of SiC and its process for growing colorless and near-colorless SiC crystals. There is no guaranty that we would be able to obtain similar quality SiC crystals from another provider. There can be no assurance that Cree will be able to continue to produce and supply us with SiC crystals of sufficient quality, sizes, and volumes that we desire or that we will be able to continue to negotiate future purchase commitments at acceptable prices that enable us to manage our inventories and raw material costs effectively.

We rely on assumptions, estimates and data to calculate certain of our key metrics, and real or perceived inaccuracies in such metrics may harm our reputation and negatively affect our business.

We believe that certain metrics are key to our business, including but not limited to AOV, average ad spend per customer and repeat customers. As both the industry in which we operate and our business continue to evolve, so too might the metrics by which we evaluate our business. While the calculation of these metrics is based on what we believe to be reasonable estimates, our internal tools are not independently verified by a third party and may have a number of limitations and, furthermore, our methodologies for tracking these metrics may change over time. Given the difficulty in tracking consumers online, calculations of our unique visitors may not accurately reflect the number of people actually visiting our platforms. We continue to improve upon our tools and methodologies to capture data and believe that our current metrics are accurate; however, the improvement of our tools and methodologies could cause inconsistency between current data and previously reported data, which could confuse investors or lead to questions about the integrity of our data. In addition, if the internal tools we use to track these metrics under-count or over-count performance or contain algorithm or other technical errors, the data we report may not be accurate. Accordingly, you should not place undue reliance on these metrics.

This Current Report does not constitute an offer to sell or the solicitation of an offer to buy any securities and shall not constitute an offer, solicitation or sale in any state or jurisdiction in which, or to any person to whom, such offer, solicitation or sale is unlawful.
